

AE109

The AE109 is designed to offer effortless room filling performance from a slimline floorstanding loudspeaker, in the same way the world acclaimed original AE109 did 20 years ago. To do this, two 4 inch drivers utilising an ultra high force motor system are used in partnership with a 28mm soft dome tweeter. The 2.5 way crossover, that combines the drivers, is bespoke and features a unique topology allowing integration and power handling previously unachievable from this type of speaker. Particular attention has been paid to the phase and time alignment for the most cohesive performance possible.

Like the AE100 standmount speaker, the driver and crossover are mounted inside a substantial 18mm MDF cabinet that takes styling cues from other members of the range. The result of this concerted effort is a product with clean and uncluttered lines that can still deliver the thrilling and powerful presentation that Acoustic Energy owners have come to expect. Satin black and walnut vinyl veneer finishes are available.

AE109 Specifications

- Drive Unit: 4" paper cone
- Tweeter: 1" dome
- Frequency Range: 40Hz -35kHz
- Sensitivity: 89dB
- Peak SBL: 113dB
- Power Handling: 150w
- Crossover frequency: 2.3kHz
- Impedance: 4ohms
- Design: 2 way
- Finishes: Satin Black and Walnut vinyl veneer
- Dimensions: 800 x 160 x 240 (HxWxD)
